EDUCATION

Télécom Paris • Engineering School (MSc of Engineering) ·

Sep. 2024 - Present

Institut Polytechnique de Paris • Top French engineering school

Tracks: 3D & Interactive Systems, Computer Vision & Artificial Intelligence

Preparatory Classes for French Grandes Ecoles (MPSI/MP) ·

2022 - 2024

Lycée Camille Guérin • Poitiers

- Ranked top of class both years.
- Intensive program in Mathematics, Physics, Computer Science.

EXPERIENCE

Industrial Internship ·

Jul. - Aug. 2025

SKF • Saint-Cyr-sur-Loire

- Reorganized and restructured digital file systems across departments
- Automated email workflows to streamline internal communications

Board Member - La Scène (Live Music Student Association) ·

2025 - 2026

Télécom Paris

- Designed promotional materials (event posters, merchandise) and managed ordering and sales
- Helped organize music festivals (300+ attendees)
- Performed in a jazz band at association events

PROJECTS

Spectral & RGB Path Tracer ·

2026 - Now

github.com/SlyZ1/Path-Tracer

Interactive physics-based renderer built with OpenGL and c++.

- MIS, NEE, BVH for SAH heuristic, EON diffuse, VNDF sampling, artistic fresnel for conductors.
- Spectral rendering, Hero-wavelength sampling, dielectric dispersion, thin-film iridescence.
- Hair/fur scattering (Chiang et al.), artistic-friendly roughnesses,

Real-Time Smoke Simulation & Rendering ·

2025

github.com/artishow-smoke/Smoke

Group project in Godot (C# & HLSL). Fluid simulation via LBM and ray-marching for single scattering.

Soft & Rigid Body Physics Simulation ·

2026

github.com/SlyZ1/Physics-Based-Bodies

Group project in Godot simulating real time soft-rigid body interactions using spring physics and soft constraints.

Face Edition by Latent Code Manipulation ·

2026

github.com/SlyZ1/Latent-Space-Faces

Group project experimenting with StyleGAN2-ADA pre-trained models to generate and manipulate photorealistic faces (Python, PyTorch).

Echo Depths • Ludum Dare 57, ranked ~50th / 3 000 entries ·

2025

github.com/Protocol-Juice/echo-depths

48-hour game jam entry built on Unity with two teammates. Full game design, art, and programming.

Isometric Procedural Environment ·

2024

github.com/SlyZ1/Isometric-Pixel-Game

Isometric pixel-art game in Unity with procedural generation and a custom lighting system.

SKILLS

Languages: C++, C#, C, Python, PyTorch, GLSL / HLSL

Tools & Engines: OpenGL, Unity, Godot, Blender, Git, LaTeX, Typst

Human languages:

French (native), English (C2)

INTERESTS

Computer graphics · Piano & jazz improvisation · Game development · Rock climbing · Graphic design
